

Retirement Saver's Credit

The Saver's Credit was established to help low- to moderate- income earners save for retirement by providing an additional credit toward tax liability on top of existing retirement savings incentives.

Who can claim the Saver's Credit?

Any person who :

- is 18 years of age or older;
- is not a full-time student;
- is not claimed as a dependent;
- has a qualifying Adjusted Gross Income* (AGI);
- and contributes to a(n):
 - 401(k) plan;
 - 403(b) plan;
 - 457 plan;
 - IRA or Roth IRA

How does it work?

If you meet the above requirements, calculate what your Saver's Credit might be by following the example and worksheet below or by completing [IRS Form 8880](#).

Example

Bill makes \$28,000 this year, assuming he contributes \$100 per month into his 401(k) account (\$1,200 per year) his AGI will lower to \$26,800. Bill files his taxes as Head of Household. Using the Saver's Credit chart on the right, based on Bill's AGI he could qualify for a credit rate of 50% of contributions up to a maximum of \$1,000. Based on these assumptions his Saver's Credit would calculate to be \$600 (see below).

Steps	Example	Your Saver's Credit
1. Tax Filing Status	Head of Household	
2. Adjusted Gross Income (AGI)	\$28,000 - \$1,200 = \$26,800	
3. Credit Rate*	50%	
4. Eligible Contributions	\$1,200	
5. Calculate your Saver's Credit (credit rate x eligible contribution)	50% x \$1,200 = \$600
